Tab D is a comprehensive compilation of statistics regarding CIA cables processed during the period 1 through 15 July 1953. The study is based on a total of approximately 5,450 cables: approximately 3,600 incoming and approximately 1,850 outgoing. The legal-size sheet lists the total number of cables in the various categories distributed to each of the various organizational components to which cables are distributed. This listing is used as the basis for computation of the percentages making up the other tabulations.
